

MG21

Liberal Arts Charter School

To whom it may concern,

It is our pleasure to write a letter in support of Sector67. Monona Grove Liberal Arts Charter School for the 21st Century (MG21) has partnered with Chris Meyer and Sector67 for the past six years. MG21 is a project-based school for students 9th - 12th grade and Sector67 has been an integral part in inspiring our students to create unique and innovative projects.

During our collaboration, Sector67 has helped develop myriad new and innovative educational opportunities to our school. In the fall of 2012, Chris Meyer was instrumental in helping us receive funding from the Berbee Technology and Education Grant to build a makerspace for our school and students. Since then, Sector67 has offered classes teaching students how to utilize the makerspace. Projects have included Arduino electronics, CNC printing, and building two of our own 3D printers. In addition, Sector67 has provided support for our staff in enhancing the STEM aspect of our curriculum through collaboration and training with teachers and workshops for our students. We feel extremely fortunate to have had the opportunity to work with Chris Meyer at Sector67 and look forward what future collaboration will bring.

Sincerely,

Rebecca Fox-Blair, Ian Lowe, Alyssa Hartson
